

## Company Profile

---

### History and Status

Whitestein Technologies was founded in 1999 and is a privately held limited company headquartered in Zug (Switzerland).

The firm's highly qualified staff of over 80 people work at offices in Zürich (Switzerland), Stuttgart (Germany), and Bratislava (Slovakia).

In 1999, Whitestein Technologies acquired Aitecon s.r.o., a Slovak software development specialist, and in 2003 it acquired Living Systems GmbH, a German pioneer of software agent technologies.

*Whitestein Technologies is a pioneer of self-adaptive enterprise software.*

We create software that dynamically responds to changing conditions so it can optimize your processes and infrastructures in real-time. To stay ahead, we are continuously advancing our innovations in the field of autonomous software agent technology.

Contact us today and learn how our software products can enable you to better manage and optimize your business processes and help your organization be more efficient and agile.

### Products

Under its *Living Systems*<sup>®</sup> trademark, Whitestein Technologies offers various agent-based software products for the logistics, manufacturing, and telecoms industries. Among them:

The *Living Systems*<sup>®</sup> *Process Suite*, a BPM suite for the design, execution, monitoring, and self-adaptive optimization of dynamic business processes.

*Living Systems*<sup>®</sup> *Adaptive Transportation Networks*, a comprehensive solution for dynamic dispatching, transport optimization, and real-time event handling in logistics operations.

*Living Systems*<sup>®</sup> *Connection Agent*, an award-winning connection manager delivering seamless handover between fixed-line, 3G/4G, and Wi-Fi connections

*Living Systems*<sup>®</sup> *SmartShift Mobile IP*, a software module enabling smart traffic offload and seamless vertical handover between cellular and Wi-Fi connections.

### Professional Services

Whitestein Technologies' product offering is complemented by an experienced professional services unit that provides consulting, support, and training as well as system integration and customization.

### Customers and Partners

Whitestein Technologies' products are used by market leaders including DHL, Daimler, or Swisscom, among others. To further strengthen its offerings and market presence, the company has partnered with a select group of leading technology vendors and service providers including Capgemini, IDS Scheer, and msg systems. Whitestein Technologies also maintains excellent relationships with several leading industry labs and academic research institutions.

### Innovation

Whitestein Technologies is a leading innovator in the areas of multi-agent systems, autonomic computing, and autonomic communications. The company actively participates in international research and standardization bodies.

Whitestein Technologies also publishes the *Whitestein Series in Software Agent Technologies and Autonomic Computing* with the aim of promoting advanced research and facilitating the know-how transfer between academia and industry.
