

Job Opportunity: Team Leader/Project Manager

About Whitestein Technologies Whitestein Technologies was founded in January 1999 with the mission to become a leading provider of advanced software agent technologies, products, solutions, and services for selected application domains and industries.

As of today, Whitestein is a team of about 90 qualified and highly skilled employees located in Zurich (Switzerland), Bratislava (Slovakia), Donaueschingen (Germany), with a fourth location currently being opened in Sophia Antipolis (France).

Whitestein strongly believes that agent-based technologies and agent-oriented software engineering methodologies enable novel, attractive market opportunities for the design and the implementation of a next generation of distributed information systems and network infrastructures, in particular in combination with other leading-edge technologies like web services, mobile computing, grid computing, and pervasive technologies such as RFID smart tags.

Open Position Whitestein Technologies is offering, to a motivated and experienced team leader/project manager, to join our Development Center to work on advanced, distributed information systems and products in the logistics, telecommunications, and financial domains.

Your Responsibilities As a Team Leader/Project Manager, you are responsible for organizing, planning and tracking demanding software development projects. You are leading a team of software engineers, keeping your eyes firmly on objectives and deadlines as well as technological risks. Tight contact with the customer is the basis for coordination and quick reactions to new and changed situations. You will assume the responsibility for the architecture design as well as its development throughout whole project.

Your Qualification

- Education**
For this position you need a technical or mathematical university degree.

- Knowledge and Experience**
Overview of the modern software development processes, current technological trends, object-oriented paradigm and a sound architectural and technological background are firm requirements.

Documented experience and success with the leading of software development teams is a firm requirement.

Furthermore, you should have the following experience:

- 3+ years of practical experience with leading software development teams through complex, international projects
- 3+ years of practical experience in design and programming using a object-oriented programming language (C++, Java) and SQL

Personal abilities/skills:

English language both spoken and written is required.

You should also possess:

- Motivation skills, initiative, creativity
- Feeling for the details, ability to distinguish the priorities and risks
- Ability to understand customer's real needs and shape objectives
- Strong communication skills
- Flexibility and reliability
- Good team-working abilities
- Seeking high professional standards

Start Date and Location

Starting date: as soon as possible.

Location: the candidate would usually work in Bratislava.
